YOUR VIEWS ON THE PROPOSAL

1. What is your view of introducing a new criminal offence of paying for sexual services? (This is the only mandatory question)

- Fully supportive
- Partially supportive
- Neutral (neither support nor oppose)
- Partially opposed
- Fully opposed
- Don't want to express a view

Please explain the reasons for your response.

There is significant evidence that this model makes sex workers less safe. It encourages sex workers to make unsafe accommodations to satisfy clients safety and anonymity. Clients will be less likely to comply with safety protocols which may identify them.

2. What is your view of repealing section 46 of the Civic Government (Scotland) Act 1982: the offence of soliciting for the purposes of prostitution in a public place?

- Fully supportive
- Partially supportive
- Neutral (neither support nor oppose)
- Partially opposed
- Fully opposed
- Unsure

Please explain the reasons for your response.

Decriminalising sex work is a great step. Sex workers are actively discriminated against in all aspects of life, from banking to the search for accommodation. Making life easier for sex workers makes the industry safer.

3. What is your view of repealing previous convictions under section 46 of the Civic Government (Scotland) Act 1982: the offence of soliciting for the purposes of prostitution in a public place?

- Fully supportive
- Partially supportive
- Neutral (neither support nor oppose)

- Partially opposed
- Fully opposed
- Unsure

Please explain the reasons for your response.

It is a fundamentally sexist practice, it is biased towards females in the industry and creates barriers for exit, and also creates social problems and encourages discrimination against sex workers especially woman.

4. What is your view of giving people in prostitution the legal right to support?

- Fully supportive
- Partially supportive
- Neutral (neither support nor oppose)
- Partially opposed
- Fully opposed
- Unsure

Please explain the reasons for your response.

I support increased legal protections for sex workers, but not due to a mistaken belief that prostitution is inherently harmful to those selling services. Sex workers should be protected from harm, and if they are fully protected, then instances of abuse can be properly reported and investigated making the industry safer, especially for woman.

5. What is your view of including provisions for exiting services in the bill?

- Fully supportive
- Partially supportive
- Neutral (neither support nor oppose)
- Partially opposed
- Fully opposed
- Unsure

Please explain the reasons for your response.

If sex work were decriminalised and people did not hold the mistaken belief that prostitution is inherently harmful, there would be no need for 'exiting services'.

6. How should the proposed offence be enforced. Are there any particular techniques which you think should be used or obstacles

which might need to be overcome?

It should not be enforced, it should be decriminalised. You cite only one reference in your limited argument against decriminalisation. You clearly have not researched this topic closely enough.

7. Do you believe that there are any new policing powers that would be necessary or beneficial for enforcing this offence?

No.

8. Please indicate which of the following forms of support and/or services you think should be provided for people in prostitution and exiting prostitution (place an x into the brackets of as many options as you agree with):

- Exiting support workers
- Drop in services
- Outreach visits to brothels, saunas and other similar premises
- Specialist medical consultations
- Access to drug and alcohol services
- Access to counselling and psychological treatment services
- Specialist housing schemes for women in crisis
- Support to access education, training or work
- Financial advice, debt support etc
- Other (please give details)

Please explain the reasons for your response and provide examples of best practice.

The articles I have indicated and good practice for anyone working in any industry.

9. Please indicate which of the following ways of raising awareness of the new offence you believe to be most effective (choose as many as you agree with):

- Internet and social media advertising
- TV advertising
- Print media advertising
- Billboards in public places and transport
- Leaflets to households
- Materials to support and exiting services for people involved in prostitution
- Materials targeted at areas where prostitution is known to occur

- Materials to health and mental health services
- Materials to further education sector
- Inclusion in secondary education (Relationship, Sexual Health, Parenting classes)
- Other (please give details)

Please explain the reasons for your response.

None. This should not be considered an offense.

10. Do you think legislation is required, or are there are other ways in which the Bill's aims could be achieved more effectively?

Please explain the reasons for your response.

Your bills aims are fundamentally ineffective. It will only increase harm to sex workers, especially woman. It will encourage unsafe practices. It will make abusers be able to move more freely in this industry. You should more fully research full decriminalisation. You should speak with people who are actively working in this industry. There is hosts of research condemning this approach. You reference UN reports but ignore the recommendations of the UN working group which found this approach to be discriminatory.

Resource implications

11. Taking into account all those likely to be affected (including public sector bodies, businesses and individuals etc), is the proposed Bill likely to lead to:

- a significant increase in costs
- some increase in costs
- no overall change in costs
- some reduction in costs
- a significant reduction in costs
- do not wish to express a view

Please indicate where you would expect the impact identified to fall (including public sector bodies, businesses and individuals etc). You may also wish to suggest ways in which the aims of the Bill could be delivered more cost-effectively.

It will cause in increase in resources from police and health agencies.

Equalities

12: Any new law can have an impact on different individuals and groups in

society, for example as a result of their age, disability, gender re-assignment, marriage and civil partnership status, pregnancy and maternity, race, religion or belief, sex or sexual orientation. What impact could this proposal have on particular people if it became law?

Please explain the reasons for your answer and if there are any ways you think the proposal could avoid negative impacts on particular people.

Gender – as it will mostly affect females negatively. Religion or belief - it may be challenged as religiously motivated.

Sustainability

13. Any new law can impact on work to protect and enhance the environment, achieve a sustainable economy, and create a strong, healthy, and just society for future generations. Do you think the proposal could impact in any of these areas?

Do not implement the bill and instead push for decriminalisation if caring for individuals in this industry is truly your objective.
